

Share ideas across teams and time zones with Dropbox Capture

A fast, efficient way to communicate through screen recordings and video messages.

Move your projects forward faster by sharing work and ideas with teams located anywhere.

Reclaim your time and help your team members do the same.

- Improve focus and productivity by eliminating lengthy emails and unnecessary meetings.
- Immediately share captures with teams so they can stay informed at their convenience.

Make yourself heard and engaged: Bring focus and clarity to your message while engaging collaboratively with others on their own time.

- Help people understand what you mean with visuals and narration.
- Easily create screen recordings, GIFs, and screenshots.
- Add markups for more emphasis and detail.

Build at scale: Create a knowledge base with as many recordings as your storage allows that can be viewed at anytime and learn what keeps your audience engaged.

- Personalize your message with a friendly video or voiceover.
- Take and share as many recordings as you want.
- Set link permissions to share only with the people you choose.

“Our team is really visual. No one wants to waste time writing up a documentation, and we all dislike meetings. So being able to quickly take and share captures is critical to how we work.”

— Christopher Scordo, Founder & Managing Director, PMTraining
