Comprehensive Security and Compliance

For Global Customers and Multi-modal Products

- Alibaba Cloud Security provides reliable security protection capabilities for global users and multi-modal products to meet security protection needs in multi-cloud, cloud-native, edge computing, and hybrid cloud scenarios.

- Alibaba Cloud Security relies on AI intelligence and precise policy security attack and defense capabilities, effectively **resisting 1.4TB of traffic attacks, 5.6 million QPS HTTP flood attacks** (CC attacks), and **tens of millions of web & host attacks.**

For Go China Customers

- Alibaba Cloud security compliance capabilities help multinational companies meet regulatory compliance, such as classified protection of cybersecurity and data security.
