

# Fact Find

Your answers to the following questions, will help us to guide you towards the correct solution for your business:

*Please use the spaces provided to give us as much information as you can.*

Tick

What type of email communications are you trying to secure?

Desktop i.e. generated by staff/agents?

- How many agents are you looking to cover?
- Automation i.e. generated automatically by back office systems?

What volume of emails do you intend to send per annum?

Would you prefer to deploy a Maillock SEG into your own infrastructure or use a fully hosted, fully managed cloud solution provided by Beyond Encryption?

What other products do you already use in your mail flow?

Mail servers e.g. M365, Exchange, Google Workspace?

Threat Protection Appliance e.g. Mimecast, Barracuda etc?

Data Loss Prevention software?

Anti-virus software?

Server Side Signature software?

Other?

Maillock allows you to brand your outbound secure emails, how many different brands will you need to support?

Maillock provides a revocation capability through a Customer API and through Outlook Add-Ins, would you like the capability to quickly revoke secure emails sent in error?

Do you relay email in volume through a mail delivery service such as Mailjet, Sendgrid etc?

Maillock SEGs can be configured to relay secure emails directly to your mail delivery service or we can provision and configure a mail delivery service for you.
