Xcitium Managed AI for Enterprises

Run AI like IT — with full control, security, and scalability.

The Next Infrastructure to Manage: AI

Xcitium Managed AI provides the first enterprise-grade platform to **deploy, train, and Manage AI agents.**

Enterprises already manage servers, networks, and apps. Now, they'll also manage **AI INFRASTRUCTURE** — the growing "shadow workforce" of specialized AI agents embedded into every department.

What It Delivers

→ **Unified AI Management Platform** – Centrally deploy, monitor, and secure all AI agents across your organization.

→ **Scalable Operations** – Train, fine-tune, and integrate thousands of agents across teams, tools, and workflows.

→ **One Platform, Endless Agents** – Prebuilt and custom AI agents for sales, support, HR, operations, and more.

→ **Custom Agent Development** – Request new, organization-specific AI agents through a guided "spec-to-build" flow.

Why Xcitium

→ **The First Platform to Manage AI Infrastructure** – Not just AI apps, but the full lifecycle: deployment, training, integration, and governance.

→ **Seamless Integration** – Works with Microsoft Teams, email, CRMs, ticketing, and existing IT systems.

→ **Built for Enterprise Scale** – Security, compliance, and scalability engineered for multi-department adoption.

Business Impact

→ Simplify AI adoption with enterprise-grade governance.

→ Protect data and maintain compliance across all AI activities.

→ Eliminate tool sprawl and manage every AI agent from one console.

→ Accelerate innovation with ready-to-deploy agents and fast custom builds.

MANAGED AI:

The platform that lets you **Manage the AI Infrastructure Powering your Business** — Securely, Efficiently, and at scale.
