

# Make everyday work more productive with Microsoft Copilot

Searching for information, drafting replies, typing up meeting actions. Too much time is still being spent on work that could be simpler.

Slower, siloed workflows

Less time for strategic or customer-focused work

Manual processes reduce productivity

Over stretched teams, despite existing tech investment

Microsoft Copilot is designed reduce these pressures. It works within your existing Microsoft 365 tools to make the workday more efficient and productive, without the stress of introducing completely new ways of working.

## The benefits for your business

When small time savings happen across multiple users, the impact quickly adds up.

### Faster meetings

Summarise Teams meetings, capture actions, and reduce time spent writing notes and follow-ups.

### Smarter document creation

Draft reports, proposals, and presentations faster using existing business information.

### Better information access

Help employees find relevant information and insights more quickly, and improve collaboration across Microsoft 365 tools like Teams, Outlook, Word and Excel.

## Technology you can trust

While Copilot helps employees work smarter, Microsoft security and compliance solutions support safe and secure AI adoption – so you can start your transformation with greater control and confidence. Together, they create a more productive, connected, and secure workplace.

## Explore what's possible

This transformation doesn't have to be stressful. We can help you start with focused use cases, small pilots, or readiness workshops to understand where Copilot could deliver the most value for your business.
