

Start your Copilot journey on a secure foundation

Organisations of every size are tapping into the value of Microsoft Copilot – using it to cut repetitive tasks and uncover insights faster for more productive work.

But taking the first step into AI can be overwhelming. That’s why we help you build the secure foundations needed to move forward with confidence.

What organisations are achieving with Copilot

Improved productivity across everyday work

Simplified collaboration and information access

Support for more efficient hybrid working

Greater value from Microsoft 365

Common AI concerns

Data protection, governance, and compliance are at the top of many organisations’ concerns.

- Human error and insider risk
- Limited visibility across data and applications
- Oversharing of sensitive information
- Increasing security and compliance pressures

But they don’t have to be.

Putting security first

We take a security-first approach to Copilot adoption, helping you build on your existing IT environment, so AI becomes a safe and secure part of your digital transformation. By combining Copilot with Microsoft Defender and Purview, we help create a workplace that is both productive and protected.

Microsoft Defender Suite

Integrated protection across devices, identities, email and apps, helps prevent threats, detect risk early and reduce the impact of cyberattacks.

What’s included:

- Defender for Endpoint
- Defender for Office 365
- Defender for Identity
- Defender for Cloud Apps
- Microsoft Entra ID P2

Microsoft Purview Suite

This helps you understand where data lives, how it’s used and how it should be protected.

Key capabilities include:

- Information Protection
- Data Loss Prevention
- Insider Risk Management
- Audit Premium
- eDiscovery Premium

Take your first step

Copilot adoption doesn’t have to be complicated or concerning. Get in touch to start your secure Copilot journey.
